Dear Karim,

Thank you once more for your book (52 Philosophy questions).

In March I try to start to use them in education of pupils with behavior problems. I wonder how they will react, what questions and answers they will have.

I will write to you later and give you some results.

Eva Gajdosova,

Who is Dr. Eva Gajdosova

**DR. EVA GAJDOŠOVÁ,
REPUBLIC OF SLOVAKIA**

I work at the Department of Psychology Philosophical Faculty, Comenius University in Bratislava, Slovakia. I am responsible for the preparation of school psychologists (pregraduate and postgraduate study) there. I also work as a school psychologist in the Private Elementary School for pupils with learning and behavior problems. I am interested in the preparation of psychologists in the Educational system all over the Europe, in the possibility to get Eupepsy diploma for Slovak school psychologists, in new psychodiagnostical methods and interventions in the work of school psychologist. My opinion is that the "Open Heart" is the most important task for school psychologists.
